

# HELLO!

Hello friend! Welcome to the new grade. How many friends do you have?

Draw emojis of the friends you have.

# Clean Air, More Plants

Do you know that looking at the colour green calms us?

We planted trees with Satnam and Ihita in the previous grade.  
Let us read why it is important to plant trees.

**Teacher:** Alright, class, today I'm going to tell you all a special story about clean air and lots of plants! Are you ready?

**Students:** Yay!

**Teacher:** Once upon a time, in a little town, there were no plants and the air wasn't very clean. But then, something amazing happened! Can you guess what it was?

**Student 1:** They planted trees!

**Teacher:** That's right! They decided to plant trees to make the air clean and fresh. How many trees do you think they planted?

**Student 2:** One!

**Teacher:** Yes, they started with one tree. And then, they planted...

**Student 3:** Two trees!

**Teacher:** Exactly! And then, they planted...

**Student 4:** Three trees!

**Teacher:** Right again! They kept planting more and more trees until they reached...

**Student 5:** Fifty trees!

**Teacher:** Wow, you're all so smart! They planted fifty trees, and soon the air became clean and fresh. Can you imagine that?

**Students:** Yeah!

**Teacher:** And do you know what happened next?

**Student 6:** What?

**Teacher:** All the animals and birds came to live in the trees! They were very happy to have a home. And the people in the town were happy too because they could breathe clean air and see beautiful plants everywhere.

**Student 7:** I want to plant trees too!

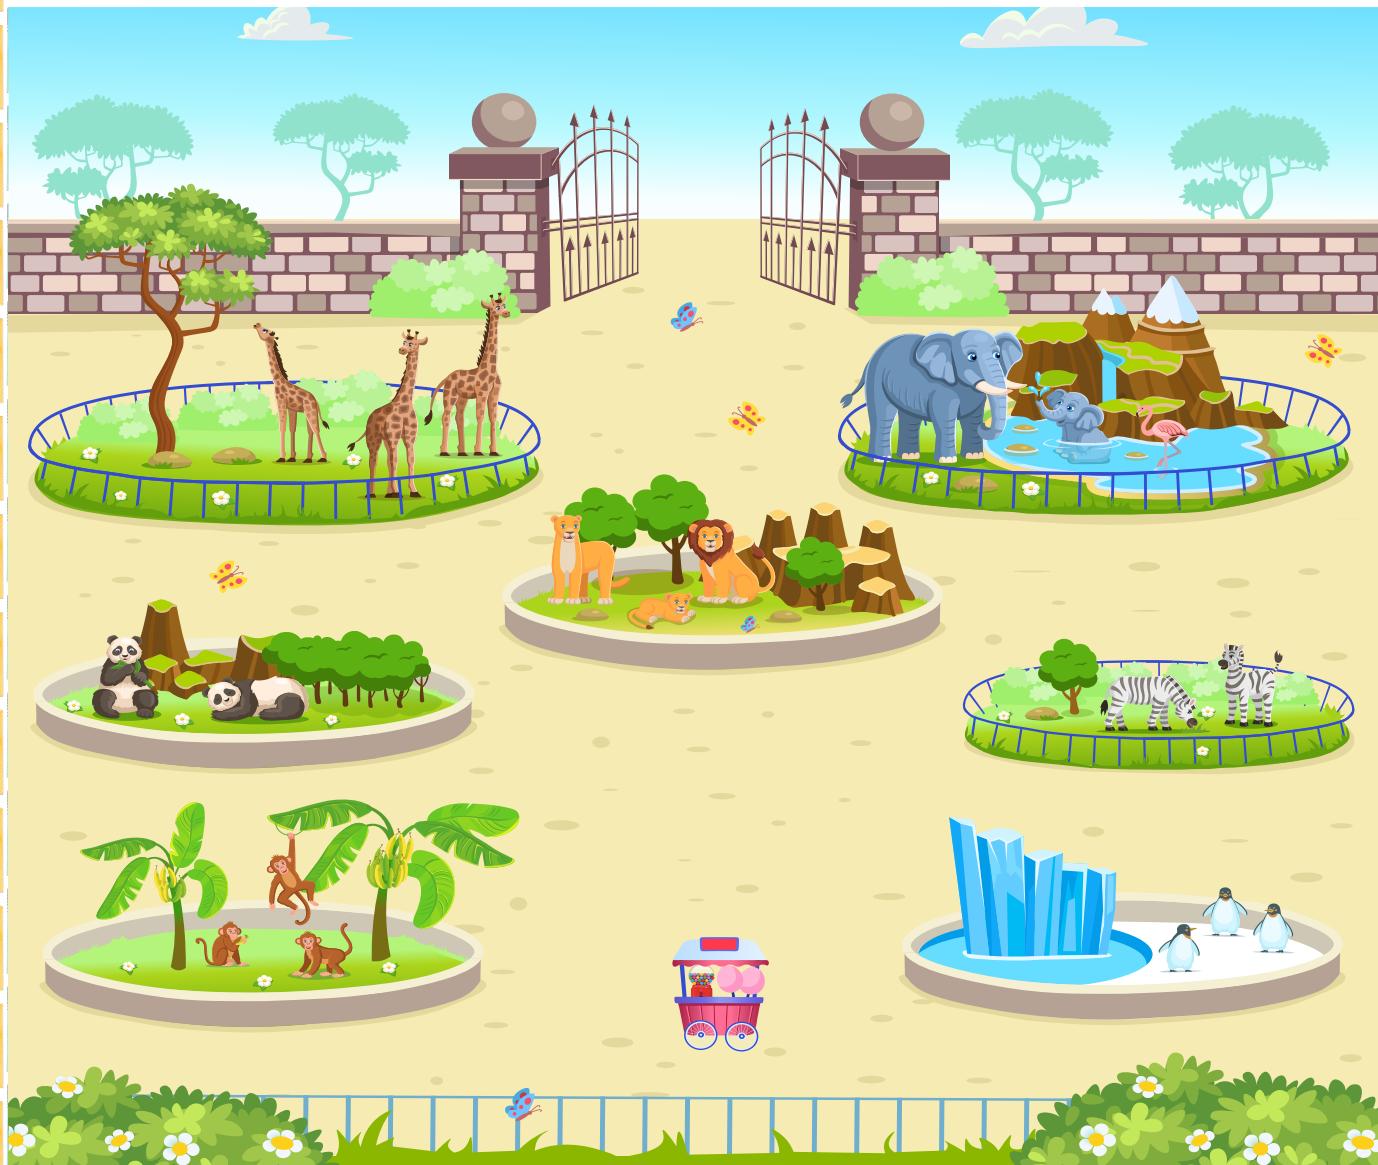

**Teacher:** That's a wonderful idea! Maybe one day you can plant fifty trees just like the people in our story. But for now, let's say thank you to the people who planted trees and made the world a better place for everyone.

**Students:** Thank you!

# Picture Talk: How many?

Here is a picture of a zoo. Look at it carefully and speak a line or two about it in front of the class. Do not forget to count the number of animals you see in the zoo and mention it to the class.

When you go to the zoo, which animal do you like to see the most?

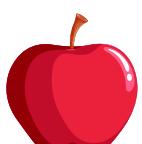

# How Many?

It is important to plan, like how you pack your bag with necessary items for school. Miss Stuti is going on a holiday with her family. She needs to pack a lot of things. Let us help her out.

Count and write the number of items in the given boxes.

Neer and Arya sit together in the class. Arya wrote 41 after 30. Neer politely informed Arya that 31 comes after 30. Arya smiled and thanked Neer. We must help each other whenever we can.
